Dear Garden Friends

By purchasing a Zuluna model you are choosing a high-quality wooden product. By manufacturing all wooden components in-house, it is always possible for us to achieve consistently high quality. We are very pleased that we can now also offer you modern modular houses in many sizes and 3 different roof shapes.

We hope you will enjoy choosing your garden house

ZULUNA – INFORMATIONS

- High quality products
- Wide, constant range of models
- Well-sorted wood, smooth and with healthy knots
- Doors with laminated timber frames, wooden thresholds and three hinges per wing
- Windows and doors with rubber seals, siliconed glass units (non-toughened single glass); 45 mm models have the option of double glazing and hinges to the right side
- Doors for log cabins 45 mm are 194 cm high, optionally possible also for 28/33 mm.
- Windows with POL hinges (turn/tilt)
- Straight fascia, roof boards 19 mm
- All floors (which are an optional item) are with 19 mm floor boards and have L-shaped foundation ring and closed frame
- Additional accessories: shingles, guttering and EPDM foil with downpipes
- All floor plan dimensions are external wall dimensions. The models are supplied in their raw state (unpainted, without roof cover material). Images in the brochure may show special accessories which are not included in the delivered order.

NEW

- Painting of doors, windows and bar tables is possible in either RAL solid colour or in transparent colour
- Wood oil pre-treatment (around all wooden elements including roof and floor, but without doors and windows) in Nature (colourless), oak blonde or antique grey
- Prefabricated buildings in various sizes (up to 300 x 400 cm) with different roof shape options

INFO

Assembly help for our Zuluna models:
This QR code takes you to our website where you can download assembly instructions, available as PDF or as a video. You can also find them in „downloads” section on: www.bertsch-holzbau.eu
We reserve the right to technical changes and errors.

NEW IN ZULUNA RANGE

- Prefabricated buildings with three roof shape options and two cladding options
- All buildings are without floor (floor kits are optional accessories)
- All doors and windows from Zuluna range are possible to add
- For additional charge the doors from log cabins range are also possible to install in prefabricated buildings.
- New in our range: two inner sliding door types and two types of door blended in the wall (ONLY for prefabricated buildings)
- Prefabricated buildings (walls, roof panels and outside of roof overhangs – outside only, doors and windows – all around) are available in RAL colours or in transparent colours.
- New method of building walls panels
1.) horizontal wall panels 2.) no vertical joining places 3.) with breathing membranes for elevations and with back ventilation of the wall

Doors with a wooden panel and rubber seal. Lock mechanism with barrel and high quality hinges.

BITUMEN SHINGLES

Order the bitumen shingles to protect your building from rain. Choose from rectangle shingles in either red, green, black, blue or brown or rounded shingles in red or black colour.

Rectangle shingles

R01 Red
R02 Green
R03 Black
R04 Blue
R05 Brown

Rounded shingles

B01 Red
B02 Black

EPDM FOIL

You can get the right EPDM sets as optional accessories for all our flat roof models. The set includes foil, glue and outlet F1 downpipe (up to 200 cm wall height) or F2 (over 200 cm wall height). Each downpipe includes necessary montage elements.

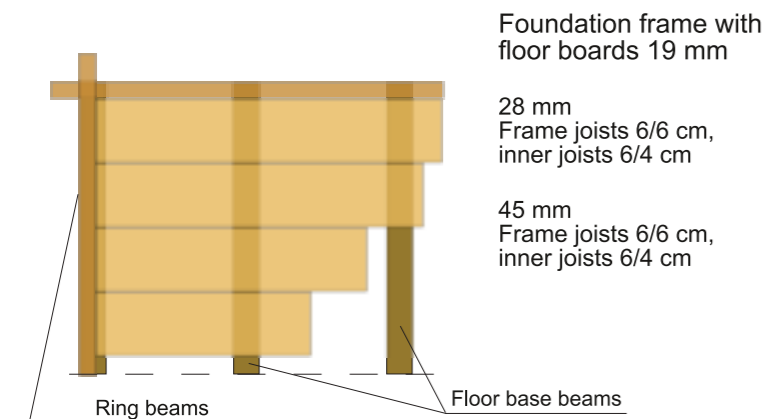

Optional roof fascia metal covers

(only with wooden cover)

for EPDM foil:

RAL 7024 graphite grey ①, RAL 8017 chocolate brown ②
RAL 9005 jet black, RAL 9006 white aluminium

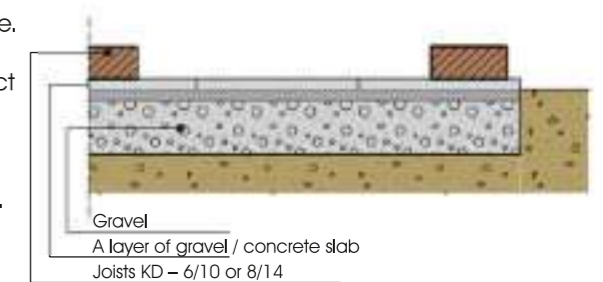

FLOOR ASSEMBLY

ALL FOUNDATIONS HAVE TO BE PROTECTED FROM FROST

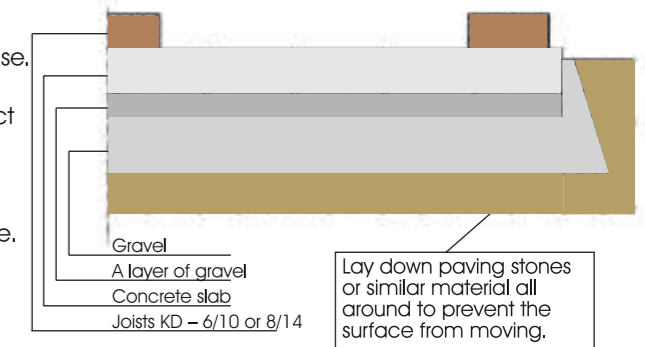

BASIC FOUNDATION TYPE 1 for buildings up to 380 x 380 cm

1. Mark the area and dig out approx. 15-20 cm.
Mark the area approx. 25 cm larger than the size of the garden house. Include the dimensions of terrace or extensions.
2. Use gravel with grain size of 0-50, height: approx. 10-12 cm. Compact the gravel to avoid later changes in the soil.
3. Lay down gravel up to approx. 3-4 cm height.
Make the whole surface of gravel level.
4. Lay down concrete slabs approx. 4-5 high to achieve a level surface.
5. Lay down joists KDI 6/10 or 8/14 cm. Make sure to use the correct height of the joists.
Pay attention to empty pipes for electrics.

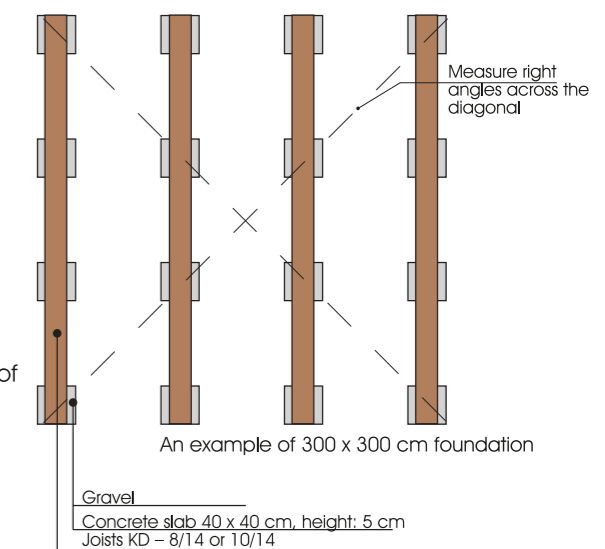

BASIC FOUNDATION TYPE 2 for buildings from 400 x 400 cm

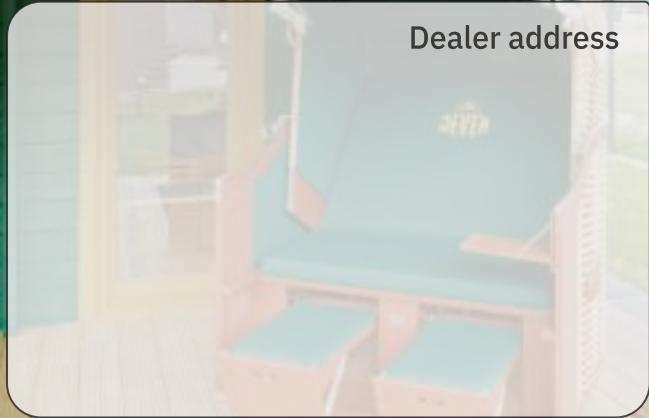

1. Mark the area and dig approx. 20 cm.
Mark the area approx. 25 cm larger than the size of the garden house. Include the dimensions of terrace or extensions.
2. Use gravel with grain size of 0-50, height: approx. 7-10 cm. Compact the gravel to avoid later changes in the soil.
3. Lay down gravel up to approx. 3-4 cm height.
Make the whole surface of gravel level.
4. Lay down concrete slabs approx. 6-8 high to achieve a level surface.
5. Lay down joists KDI 6/10 or 8/14 cm. Make sure to use the correct height of the joists.
Pay attention to empty pipes for electrics.

FOUNDATION MADE FROM POSTS

1. Mark the area and dig approx. 15 cm.
Mark the area approx. 25 cm larger than the size of the garden house. Include the dimensions of terrace or extensions.
2. Use gravel with grain size of 0-50, height: approx. 6 cm.
Compact the gravel to avoid later changes in the soil.
3. Lay down gravel up to approx. 3-4 cm height.
Make the whole surface of gravel level.
4. Lay down concrete slabs approx. 4-5 high to achieve a level surface.
5. Lay down joists KDI 8/14 or 10/14 cm. Make sure to use the correct height of the joists.
Pay attention to empty pipes for electrics.
