

MAFAL

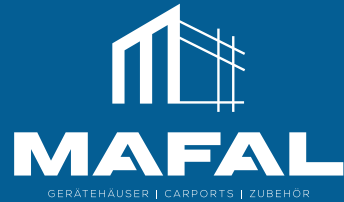

TOOL SHEDS | CARPORTS | ACCESSORIES

The new definition of
Metal garden houses

ABOUT US

DURABILITY
AESTHETICS
INNOVATION

MAFAL is a new brand in the family  **BERTSCH HOLZBAU**, created for those who value modern design, functionality, and creative freedom

It is a response to the growing demand for high-quality, low-maintenance metal storage sheds and carports for outdoor use, both in private gardens and on company premises as well as in public areas.

PRODUCTS

METAL TOOL SHEDS

Compact or extended with a wood storage section, ideal for storing tools, garden equipment, or bicycles. Thanks to the thick sheet metal (0.5 mm) and coating, the structures are corrosion-, moisture-, and mechanically-resistant, as well as low-maintenance.

CARPORTS

Available in many configurations: open, partially enclosed, with the option to add equipment boxes, lockable storage compartments, or decorative wooden panels.

FUNCTIONAL GARDEN ACCESSORIES

Waste bin enclosures – aesthetic and durable covers designed to conceal unattractive containers.

Waste bin shelter – larger structures with the option of being lockable and ventilated.

Bicycle boxes – secure and sturdy storage solutions for bicycles, scooters, or sports equipment.

Here you will find metal garden sheds, carports, and accessories that combine the durability of steel with an aesthetic refined down to the smallest detail.

What sets our products apart?

First and foremost, the possibility of complete customization—in terms of dimensions, functional layout, color, and type of finish. This allows every customer to create a product that perfectly matches their needs and the style of its surroundings.

Metal with character

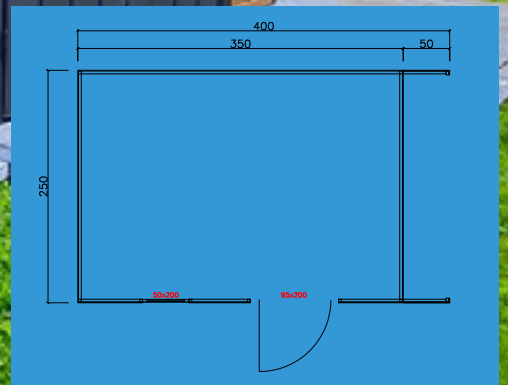

Trust the quality of BHB and discover a new construction approach that redefines how we create modern metal garden design. Choose modularity, aesthetics, and reliability—and create a space that meets your needs.
